processed in a client server system.

[c4] 4. A system according to claim 2 in which said system is  
connected to through the Internet.

[c5] 5. A system according to claim 2, further comprising: (a)  
computer processor  
means for processing data; (b) storage means for storing  
said data on a storage  
medium; (c) communication means for transmitting data  
in a secure environment to and from various remote lo-  
cations; and (d) computer software means for creating  
and displaying trade data concerning a particular trade  
in the form of a trade record.

- [c6] 6. A system, as claimed in claim 5 wherein said computer software means further comprises: means for inputting and storing system information on said storage means.
- [c7] 7. A system, as claimed in claim 5 further comprising: means for monitoring the modification of trade data in respective trade records which are created by said computer software means.
- [c8] 8. A system, as claimed in claim 8 further comprising: a flagging means which is flagged if trade record meet a certain criteria.
- [c9] 9. A system, as claimed in claim 8 further comprising: when said flagging means is flagged then said system will send said information to a regulatory body.
- [c10] 10. A system, as claimed in claim 1 further comprising: where said rights holder is verified through a verification means.
- [c11] 11. A securities reporting method comprising: having a market order book, and displaying the rights holder of the security being traded.
- [c12] 12. A method according to claim 11 in which includes having said system being a data processing system.

- [c13] 13. A method according to claim 12 in which includes having said system being processed in a client server system.
- [c14] 14. A method according to claim 12 in which includes having said system being connected to through the Internet.
- [c15] 15. A method according to claim 12, further comprising:  
(a) having a computer processor means for processing data; (b) having a storage means for storing said data on a storage medium; (c) having a communication means for transmitting data in a secure environment to and from various remote locations; and (d) having a computer software means for creating and displaying trade data concerning a particular trade in the form of a trade record.
- [c16] 16. A method, as claimed in claim 15 which includes having means for inputting and storing system information on said storage means.
- [c17] 17. A method, as claimed in claim 15 further comprising: having means for monitoring the modification of trade data in respective trade records which are created by said computer software means.

- [c18] 18. A method, as claimed in claim 17 further comprising:  
having a flagging means which is flagged if trade record  
meet a certain criteria.
- [c19] 19. A method, as claimed in claim 17 further comprising:  
flagging said flagging means and having said system  
sending said information to a regulatory body.
- [c20] 20. A method, as claimed in claim 11 further comprising:  
verifying said rights holder through a verification means.
- [c21] 21. A securities reporting system comprising:  
having flagging means which is flagged if trade record  
meet a certain criteria, and having said system will send-  
ing said information to a regulatory body.
- [c22] 22. A system according to claim 21, further comprising:  
(a) having a computer processor means for processing  
data; (b) having a storage means for storing said data on  
a storage medium; (c) having a communication means  
for transmitting data in a secure environment to and  
from various remote locations; and (d) having a com-  
puter software means for creating and displaying trade  
data concerning a particular trade in the form of a trade  
record.
- [c23] 23. A system, as claimed in claim 21 further comprising:  
where said rights holder is verified through a verification

means.
